

Specialty Tapes

MORE EFFICIENT,
MORE PROFITABLE

NEKOOSA.COM

Whether you're screen printing, decorating garments or painting a sign, RTape has the specialty tape to make your job faster, easier and more trouble free.

Block Out

Film Tape

Blue Block Out™ tape is a self wound polyethylene film tape coated with an aggressive adhesive. It's water based adhesive resists attacks by inks and solvents, and withstands multiple pressure washes and solvent baths. Blue Block Out™ is easy to apply and removes cleanly from frames and mesh with no adhesive residue.

Pallet Protek

Paper Tape

Pallet Protek™ is a standard weight saturated smooth paper tape with heat resistant adhesive. Cleaning up messy spray adhesive from your pallet is time consuming and costly. It's also unnecessary. By covering your pallet with Pallet Protek™ and spraying the paper tape instead of the pallet, press clean up time is simply a matter of removing and discarding the tape. The whole process is fast and easy.

BLOCK OUT TAPES

Applications

Screen printing
Wooden frames
Aluminum, retensionable frames

Features

Water based adhesive
Self wound polyethylene film

Benefits

Easy to apply
Removes cleanly
Durable during pressure washes and solvent baths

PALLET PROTEK

Applications

Textile screen printing

Features

Smooth paper tape
Heat resistant rubber adhesive

Benefits

Save time and money
Reduce clean up time
Fast curing

ProGrade

Paint Mask

ProGrade™ vinyl paint mask is a specially designed removable film used in making computer-cut stencils for painted graphics. ProGrade™ paint mask can be used for either sign shop or body shop applications, and with either sign lettering enamels or automotive urethane paints. ProGrade™ is a user-friendly adhesive and easy to transfer from the release liner. Easy to apply, and removes with no adhesive residue. Unlike cheaper paint masks, ProGrade™ uses a polymeric vinyl facestock, which is much easier to plotter cut and weed, even when producing paint mask stencils with fine detail.

HotMask

Transfer Tape

HotMask® series of self-wound polyester transfer tapes are designed to protect printed heat transfer material from the high temperatures of heat pressing. Available in different tack levels, HotMask® transfers print and cut graphics from the carrier film and aids alignment of the graphic to the garment.

PROGRADE PAINT MASK

Applications

Paint graphics
Paint mask stencils
Plotter cut letters and decals

Features

Polymeric vinyl facestock
Removable adhesive

Benefits

Compatible with either sign lettering enamels or automotive urethane paints
Easy to apply and remove with adhesive residue

HOTMASK

Applications

Printed flock films
Polyurethane films
Vinyl films

Features

Polyester transfer tape

Benefits

Protects the printed surface from discoloration
Removes easily without any adhesive residue
Compatible with all brands and types of printable heat activated media
